

ImageNet™ Payments

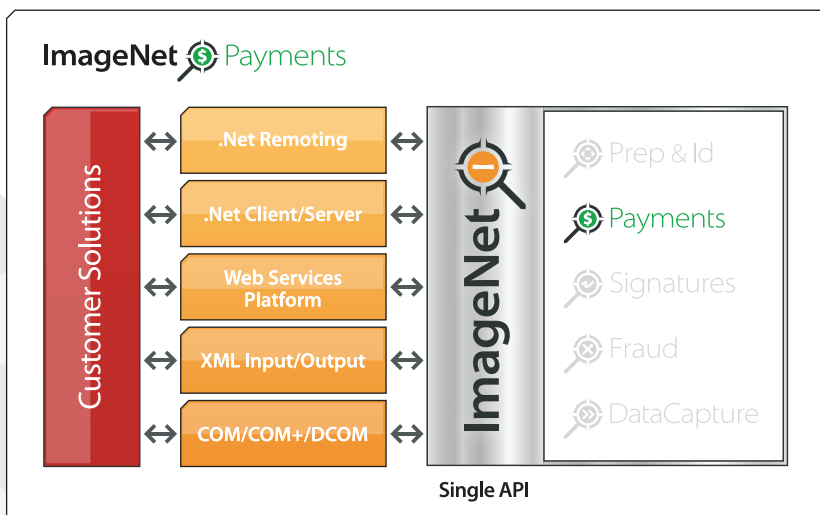

Remote Remit — The Total Remote Deposit Capture Toolkit

Remote Deposit and Remittance Requires More Than Simply Check Processing. ImageNet™ Payments Remote Remit™ delivers everything needed to implement fully automated remote capture – including a Flexible, Web Services-Enabled, .NET® Environment.

ImageNet™ Payments Remote Remit is a powerful check and coupon identification, extraction and signature detection solution which links Back Office Conversion (BOC) with increasingly popular Remote Deposit Capture (RDC) for merchants, tellers or outsourced service providers.

▶ Introducing ImageNet: Built for Distributed Remote Capture.

The key to unlocking the power of ImageNet Payments Remote Remit™ is Mitek's new Microsoft® .NET®-based ImageNet platform. ImageNet's Service-Oriented Architecture (SOA) means application developers and integrators can add more than a dozen capabilities to their existing banking or other applications, or run them separately in a Web browser – perfect for distributed remote capture – or in a rich client. And ImageNet exposes all this functionality through a single Application Programming Interface (API).

▶ ImageNet™ Payments Remote Remit™ Eliminates Coupon Setup

ImageNet Payments Remote Remit™ breaks new ground in remittance processing. It's the first product that dynamically extracts data from a batch of coupons and checks with various designs – without manual setup of coupons and checks. That cuts processing time and costs.

Other ImageNet Payments Advantages:

- ◆ Centralized or Distributed Deployment: Maximizes flexibility in developing remote branch and merchant capture solutions.
- ◆ Beyond Checks: Automatically reads and processes personal and business checks, cash in/out tickets, deposit slips, remittance coupons and more.
- ◆ Check 21 Compliant: Assesses image quality against FSTC standards.
- ◆ Works with Image Replacement Documents (IRDs)
- ◆ Highest read rates available:
 - 85 percent for personal checks
 - 95 percent for business checks
- ◆ Reduces manual data entry costs by up to 90 %

Comprehensive Analytics and Extraction

- ◆ Mitek Exclusive: Smart Coupon Recognition (SCR) reduces set-up; perfect solution for deposits and remittances from multiple sources.
- ◆ Image Cleanup Improves Readability: Deskews and despeckles the image then repairs broken characters.
- ◆ Locates, recognizes and compares a check's courtesy and legal amounts.
- ◆ Validates Image Cash Letters by reading MICR lines with powerful E13B OCR engine.
- ◆ Extracts name and address and separates subfields as needed for targeted marketing campaigns.
- ◆ Locates and recognizes dates.

Software Development Kit (SDK) Highlights:

- ◆ Single API
- ◆ .NET® interface: all .NET® languages supported
- ◆ Web-enabled: Can run as a Web service
- ◆ Rich Client or Browser-based Applications
- ◆ COM/COM+/DCOM Interfaces
- ◆ Automatic load balancing uses all available CPUs or CPU cores
- ◆ Ready-to-run sample programs included

System Requirements:

- ◆ Intel Core 2 Duo™ or newer CPU, 2 GHz or faster
- ◆ 1 GB RAM (2 GB for web server)
- ◆ 256 MB disk space for software
- ◆ Windows XP Pro / Windows 7 / 2003 Server / 2008 Server (32-bit mode)
- ◆ Visual Studio 2005 Pro or newer

About Mitek Systems

Mitek Systems, Inc., is the leader in Check Image Analytics used to detect check fraud and improve customer service.

Mitek Systems software diagnostic tools and image recognition engines provide our clients with a cost effective way to provide greater security to their clients.

Contact Mitek Today

Contact Mitek Systems at **858.503.7810** today to learn more about its range of ImageNet™ solutions.

Mitek's exclusive Smart Coupon Recognition can extract data from different designs of coupons and checks in the same batch – without manual setup for each design.
